

# Ring Size Finder

## Before you start...

- Measure her finger at normal body temperature
- Do not measure while her fingers are wet or cold
- If her knuckle happens to be a bit larger than the base of her finger, measure both the base of finger and knuckle, and select the size in between the two

1

Find a strip of paper about 15cm long and 0.6cm wide.

2

Wrap it around the base of her finger (and knuckle), and mark the point on the paper where it overlaps, forming a complete circle.

3

Compare the length of the paper to the measurements below to determine ring size. If she is between sizes, order the larger size.
